

ECN – Background info

J. Kuipers

G. Aranda Almansa

Gas Analysis Workshop
Amsterdam, 10 June 2016

Energy research Centre of the Netherlands (ECN)

- Dedicated to Sustainable Energy Innovation

With and for the market, ECN develops knowledge and technology that enable a transition to a sustainable energy system

- Core activities

Sustainable energy technology development

R&D services to industry

Feasibility studies, system & technology assessments

Biomass

Solar

Wind

Energy efficiency

Policy studies

Petten Energy Research Campus

Efficiency**

Bioenergy group

Higher efficiencies, higher availability, lower environmental impact, higher public acceptance, lower CAPEX/OPEX, new applications

Technology development, licensing, techno-economic evaluations, LCA, consultancy, testing and analyses, due diligence

Thanks for your attention!
